

Paid Summer Internships in Clean Energy

Are you passionate about fighting climate change, addressing environmental harms, or advancing a cleaner, greener, more sustainable world? Have you wondered whether your studies, skills and experiences could help you get a job working on these issues? If this describes you, keep reading for a great opportunity this summer to get your foot in the door and explore jobs making a positive impact - without needing an engineering or science degree.

The Massachusetts Clean Energy Center (“MassCEC”) seeks to increase diversity within the Commonwealth’s clean energy workforce and create career pathways for Massachusetts college and clean energy certificate students that lead to greater economic stability. In doing so, MassCEC is interested in ensuring students of color are exposed to career pathways and opportunities in clean energy.

All In Energy is a nonprofit with a mission to accelerate an *inclusive* clean energy economy. We are partnered with the MassCEC to recruit students of color for internships with clean energy companies and environmental nonprofits during the summer 2021 cohort of the MassCEC Clean Energy Internship Program.

These paid positions are funded by the MassCEC. To participate in the program, candidates must either attend, or have graduated within the past year, from a Massachusetts college or university or they must be a Massachusetts resident with proof of residency who attended an out-of-state college or university. Students pursuing a master’s degree are eligible for this program, though Ph.D. candidates are not. For more information on the MassCEC Internship Program visit www.masscec.com/clean-energy-internship-program.

All In Energy is recruiting on behalf of several clean energy companies and nonprofit organizations in the renewable energy and energy efficiency sectors for **paid summer internships focused on:**

- **Marketing and Communications**
- **Organizing and Outreach**
- **HR and Recruiting**
- **Graphic Design**

Most of these positions have in person and remote working options. A partial list of organizations offering these positions is below.

If you are interested in learning more, please send your resume and a short note about your areas of interest to careers@allinenergy.org.

Energy Efficiency:

- [Abode Energy Management](#), **Concord**: a boutique energy consulting firm driving efficiency improvements for New England's built environment, with expertise in building performance, renewables, clean energy financing, utility program implementation, community engagement, and workforce development.
- [Revise Energy](#), **Haverhill**: Founded in 2016 to deliver whole-home energy efficiency solutions that are affordable to implement.
- [Neeeco](#), **Wilmington**: Helps homeowners increase their energy savings by decreasing their energy costs through energy efficiency and rooftop solar.
- [Valley Home Insulation](#), **Lawrence**: A fully bilingual (Spanish/English) startup company helping homeowners to lower their utility cost through energy efficiency, keeping more of their hard earned money in their pockets.

Renewable Energy

- [Solstice Initiative](#), **Cambridge**: A certified B Corp that organizes, educates, and innovates to make solar accessible for every American through community solar development.
- [Sunwealth](#), **Cambridge**: An innovative, tech-driven clean energy investment firm with a portfolio of commercial solar projects that boast significant financial returns and provide high-efficiency solar power to businesses, municipalities, and non-profit organizations.
- [Relay Power](#), **remote**: Empowers communities to meet the climate crisis by connecting them to simple, impactful solutions, like community solar.
- [EnergySage](#), **Boston**: Provides a 100% online experience that allows customers to receive and compare multiple solar quotes and then decide on an installer.
- [HomeWorks Energy](#), **Medford**: The largest Home Performance Contractor for the Mass Save programs, focused on making it easier for homeowners to reduce their energy costs and carbon footprints through energy efficiency upgrades. Also in New York state.

Non-Profit

- [MassEnergize](#), **Concord**: Supports community leaders with tools to help them motivate residents and businesses to reduce greenhouse gas emissions and prepare for a changing climate.
- [Groundwork Lawrence](#), **Lawrence**: Creates the building blocks of a healthy community and empowers residents to improve their quality of life through environmental and open space improvements, healthy food access programs, youth education, employment initiatives, community programming and events.
